

LOUIS RIVES-LEHTINEN

Gameplay Programmer — C++ / Unreal Engine 5

Open to relocation worldwide — particular interest in Asia & the Nordics

louisrives2003@gmail.com · +33 6 95 29 85 93 · [Portfolio](#) · [GitHub](#) · [LinkedIn](#)

Gameplay programmer specializing in player movement, combat, and game feel. MSc Game Technology graduate with hands-on experience in Unreal Engine 5/C++, Unity, and GameMaker Studio. Builds and ships gameplay systems independently, with a research background in player-adaptive tutorial design.

SKILLS

Programming C++, C#, Java, Python, GML, C, SQL, JavaScript

Game Development Unreal Engine 5, Unity, GameMaker Studio, Git, Blender

Gameplay Player Movement · Combat Systems · Enemy AI · Game Feel & Feedback Systems · Tutorial & Onboarding Design

SELECTED PROJECTS

Arena Shooter — Unreal Engine 5 / C++ *Personal Project · In Progress*

- Developing a fast-paced 1v1 arena shooter inspired by Quake and the Team Fortress 2 MGE community mod
- Designed and implemented a physics-driven movement system: rocket jumping, wall-running, bunny-hopping, air-strafting, and surf mechanics
- Built game-feel systems including hitstop, camera shake, and frame-synchronized animation and audio feedback

Project page: louisrives.github.io/projects/arena_shooter-eng.html

Hyper Pulsar — GameMaker Studio *Solo Project · 300+ hours*

- Solo-developed a complete hardcore top-down shooter inspired by Hotline Miami and Katana Zero, from gameplay architecture through final art and animation
- Designed state management, enemy AI, combat systems, pixel art, and animation from scratch

Personality-Adaptive Tutorial Design — MSc Thesis *Breda University of Applied Sciences*

“Match the Player, Not the Game”

- Designed and conducted a 2x2 between-subjects pilot study (N=16) investigating how tutorial style (minimal vs. explicit) interacts with player personality in Souls-like games
- Applied player-experience research to tutorial and onboarding design, using perceived competence as the primary evaluation metric

Selected Team & Academic Projects *CERI Avignon*

- A Night at CERI — Unity horror game; environment art and lighting, 24-hour game jam (team of 4)
- MapTrip — Java Android travel-journaling app (team of 3, Erasmus)
- Multiplayer Wordle — Java local-network multiplayer game with AI opponents (team of 4)
- Tic-Tac-Toe AI — JavaFX/MVC game with a trainable AI opponent (team of 2)

EDUCATION

MSc Game Technology — Breda University of Applied Sciences (BUAS), Breda, Netherlands 2025–2026

BSc Computer Science — CERI Avignon, Avignon, France 2021–2024

Erasmus Exchange — VUT Brno University of Technology, Czech Republic

OTHER EXPERIENCE

Guest Reception & Concierge — La Divine Comédie (Luxury Hotel), Avignon, France 2026 · 5 months
