

Louis Rives Lehtinen

Game Developer

Profile

I'm passionate about computer science and video games. I earned my Computer Science degree at the CERI in Avignon, where I developed strong software development skills. During my third year, I studied in Brno through Erasmus, an experience that enriched both my personal and professional growth.

Video games have always been a major passion of mine, leading me from playing games to creating them. During my gap year, I developed a hardcore top-down shooter inspired by Hotline Miami and Katana Zero using GameMaker. I am currently pursuing a Master's degree in Game Technology at the Breda University of Applied Sciences.

As a dual French-Finnish citizen, I have always enjoyed discovering new cultures and environments, which continues to motivate my personal and professional development.

Projects

○ Sept 2025 - Present

Breda University of Applied Sciences

Master Thesis

A controlled study on whether matching a game's tutorial to player personality improves the first hour of a Souls-like (Lies of P): two tutorial versions, 29 players, behavioural and survey data analysed in R. Combined game design, player research, and statistics.

○ Aug 2024- Present

Making my own Game

I am still currently developing my own game using the GameMaker engine. It's a top-down shooter, one-hit-kill inspired by titles like Hotline Miami and Katana Zero. The game emphasizes fast-paced action, challenging gameplay, and a distinctive visual style, allowing me to combine creativity and technical expertise.

○ Feb 2024 - July 2024

Avignon University

Wordle Game & Tic-Tac-Toe

Development of a Wordle and a Tic-Tac-Toe video game with a graphical interface, multiplayer features, and bot player integrations, using javafx, as part of a university project in teams.

○ March 2024

CERI BDE

24 hours of coding (coding party)

Development of a first-person horror game "Night at the CERI", with three teammates, during a 24 hours of code event organized by a student association.

○ Sept 2023 - Jan 2024

Brno University of Technology

Map'Trip

Development of a mobile application featuring an interactive world map that allows users to create annotations for each country. These notes are designed to document your travels, including the dates of your stays, activities undertaken, and any other relevant information about your travel experiences.
